

## easywash365+® spray guns by Suttner

Freeze stop valves in **easywash365+®** spray guns and freeze stop spray guns

The valves are made entirely of non-rusting materials.

Contrary to all commercially available freeze stop valves, the actual internal valve body is made of a very wear-resistant, partially crystalline thermoplastic. This difference significantly increases the robustness, reliability as well as preciseness in switching.

What is the difference between the versions freeze stop and weep?
