SB325 Misfilling

EN. Safety is guaranteed by the break-away system. In the event that a vehicle accidentally drives away with the nozzle still in the tank, the spout is designed to detach from the nozzle. This system also allows for a quick repair by merely fitting a new spout onto the nozzle.

ES. El sistema Break-away garantiza una seguridad elevada al momento de su uso ya que protege contra los posibles daños causados por arranques accidentales cuando la pistola aún este abasteciendo el depósito del vehículo. El caño se ha diseñado para separarse de la pistola cuando se plantea la antes mencionada situación. Este sistema también permite el rápido reemplazo de la pistola simplemente con sustituir caño.

RU. Для повышения уровня эксплуатационной безопасности имеется разрывная муфта, которая защищает раздаточную систему и сам автомобиль от повреждений вследствие при старте автомобиля, когда пистолет не вынут из бака. В этой ситуации конструкция носика предусматривает его отделение от пистолета. Кроме того, такая система позволяет быстро восстановить работу пистолета, просто заменив носик.

FEATURES

Multifunction
display

5 digit partial. Total.
Resettable total and
calibration available.
Low battery icon.

Stainless steel
Spout

Code: R19172000
(misfilling spout)
Code: R19173000
(standard spout)
